

Course Details

FA16 Oxygen Therapy for Cyanide Poisoning

This short (4hours) course is designed as an additional module for qualified First Aiders working in an environment where there is a likelihood of cyanide poisoning.

Content

The programme includes:

- ❑ The nature of poisoning
- ❑ A revision of CPR
- ❑ The loading and management of patients on long boards
- ❑ The keeping of simple records following an accident

The course follows a syllabus laid down by the Dimension People -Safe family of first aid training systems which utilises the following training methods:

- Video/DVD segments to convey essential information
- Hands on practice in small groups
- Positive coaching from approved and professionally qualified Instructors.
- Up-to-date medical information presented in a stress-free learning environment
- Opportunity for self appraisal and completion of a class evaluation

The course follows the guidelines and protocols of many of the national governing bodies such as the FA, RFU, and St Johns etc

Certification

Students will receive a certificate of attendance

Course Duration

4 Hours

NB. Students will be required to produce evidence of a current First Aid Certificate from an appropriate recognised First Aid training organisation
